RAJ PATEL

SOFTWARE DEVELOPER | QA ENGINEER

PROFESSIONAL SUMMARY

Detail-oriented and results-driven QA Engineer with over 3 years of experience leading quality assurance efforts across 50+ enterprise-level web and SaaS projects. Expert in building automated testing frameworks, improving deployment pipelines, and reducing regression overhead. Adept at Agile methodologies, test planning, and collaborating across cross-functional teams to ensure scalable, performant, and bug-free digital experiences. Skilled in accessibility compliance, performance monitoring, and front-end quality validation.

CORE COMPETENCIES

Testing & QA: Test Automation, Regression Testing, Manual Testing, Functional Testing, API Testing

Development Methodologies: Agile/Scrum, CI/CD Pipelines, QA Strategy, Defect Triage, Quality Metrics & Reporting

Web & UI/UX: Cross-Browser Compatibility, UI/UX Validation, Accessibility Compliance (WCAG 2.1), Performance Optimization

Selected Achievements

- Reduced sprint-based QA testing time by **60%** by architecting Selenium-based automation frameworks integrated with CI/CD pipelines (GitHub Actions)
- Led quality strategy for **50+ concurrent projects** as sole QA Engineer; maintained **99.9%** uptime and achieved zero post-release critical bugs over 2 years
- Boosted website performance scores by **40%** by analyzing Lighthouse metrics and implementing front-end optimization recommendations
- Ensured full WCAG 2.1 accessibility compliance across 50+ sites through rigorous audits and collaborative design reviews
- Migrated and optimized **120+ legacy CMS pages**, decreasing average page load time by **35%** and improving SEO rankings sitewide

EMPLOYMENT HISTORY

SEP 2024 - PRESENT

Webmaster | Web Content Administrator, Phoenix Fitness, Milltown, NJ

- Administered and maintained high-traffic websites across Agile release cycles, ensuring stable deployments and on-time updates
- Maintained and enhanced front-end codebases using **HTML, CSS, and JavaScript** to deliver UI improvements, bug fixes, and feature updates
- Implemented routine site maintenance processes including updates, backups, and security enhancements to reduce incidents and downtime
- Executed **cross-browser, cross-device, and responsive validation**, ensuring consistent rendering and accessibility compliance
- Managed CMS-driven content updates and front-end configurations using version control, maintaining **99.9% site uptime**
- Optimized site performance through caching strategies, asset compression, and front-end best practices

Tech Stack: *HTML, CSS, JavaScript, TypeScript, Tailwind CSS, React, PHP, WordPress, Adobe AEM, GitHub, Figma, Adobe Creative Suite, Chrome DevTools, Lighthouse, Google Analytics*

FEB 2022 - JUL 2024

Software Quality Engineer, Zeek Interactive, St. George, UT

- Directed QA across **50+ Agile development cycles**, establishing scalable test processes and ensuring on-time delivery of defect-free releases
- Developed robust automated regression suites using Selenium, reducing manual test effort and increasing test coverage to **90%**
- Executed and documented test plans, test cases, and edge case validations across various browsers and devices
- Monitored web performance and implemented front-end enhancements that improved user engagement and session duration
- Collaborated closely with design and development teams to validate user experience, accessibility, and brand consistency across web products
- Contributed to CMS content management and system optimizations, maintaining site uptime at **99.9%**
- Leveraged tools like Ghost Inspector and Appium to design, implement, and maintain robust automated test suites, ensuring comprehensive and efficient test coverage.

Tech Stack: *HTML, CSS, JavaScript, TypeScript, Tailwind CSS, React, PHP, Laravel, .NET, WordPress, Adobe AEM, GitHub, Jira, Figma, Adobe Creative Suite, Chrome DevTools, Lighthouse, Google Analytics, Appium*

MAY 2018 - SEP 2018

Marketing Intern/Webmaster, Verdure Sciences, Noblesville, IN

- Launched **10+ SEO-optimized product landing pages**, contributing to a **15% increase in user engagement**
- Designed brand assets and UX-focused layouts using Adobe Creative Suite to elevate product presentation and consistency
- Managed weekly website updates and CMS content audits to ensure quality, accuracy, and branding across platforms
- Authored onboarding documentation and process flows that improved internal training efficiency by **30%**

Tech Stack: *WordPress, HTML, CSS, JavaScript, Adobe Illustrator, Adobe Photoshop, Figma, GitHub*
